OVERVIEW

SR is a young hip-hop trio based out of Miami whose members include Slow V & Retrospect (SR) along with producer N.y.E. The group came together in mid 2005 and set out to create what they hoped would be a modern day classic. The result is *Radio*, a musically "rich" work of art which has received an impeccable pre-release response from youthful fans on the streets and the internet, particularly including *myspace.com*, where the groups several thousand "friends" regularly engage in incessant praise. Across its 15 lushly produced tracks, *Radio* is interlaced with skits that tell the story of a 12-year old boy named Damian—and the story is one that ends with a shocking twist. Although the songs and storyline on the album are not altogether related, the sequence flow perfectly intertwines between songs and skits. The songs themselves are crafted so as to appeal to a vast audience, touching on topics ranging from problems with their generation ("New Generation Theory") to self-esteem issues ("Dream Catcher") and even a dramatic sex scandal ("Need It").

The release of *Radio* is an attempt to stand out in an industry driven by money and talentless so-called "rap artists". At the group's young ages, it's impossible not to respect their "go-against-the-grain" mentality. Check out SR as they embark on a path to make a difference in their most-beloved art form.
